

Product information

EXPANSION JOINTS / BELLOWS / FLEXIBLES / INFLATABLE SEALS

J-Flex supply a wide range of flexible products, custom made to specific requirements allowing for thermal movement; isolation of vibration and compensation for misalignment in ductwork and piping.

Elastomeric joints are available with one or more reinforcing layers of fibre-glass, aramid, wire or combinations of these to provide strength for extreme pressure and tensile loading. Our joints can be supplied in any form fully assembled or open ended for site assembly.

All J-Flex elastomeric joints are manufactured to 'FSA' (U.S. Fluid Sealing Association – Non-metallic Expansion Joints Standard).
