

J-Flex moulded to perfection

- ▶ One our major successes in recent years has been the development of our custom moulding service, now in great demand by existing and new customers.
- ▶ We mould by compression; transfer and injection moulding techniques – see information sketch of each technique.
- ▶ We make our own mould tools in-house to exacting standards. Quality at a lower price.
- ▶ J-Flex is the comprehensive source for all your moulding requirements be it in small, medium or large volumes.
- ▶ Your customised order is made in-house by a skilled workforce.
- ▶ Our polymer range is vast. We can offer Natural, Neoprene, Nitrile, E.P.D.M., Butyl, Hypalon®, HNBR, CXNBR, Silicone, Fluorosilicone, Viton®, Fluoroelastomers, Aflas® and Perfluoroelastomer.
- ▶ We sample new moulds to your complete satisfaction and approval before we commence bulk supply.
- ▶ We guarantee you top quality mouldings every time using our ISO9001 batch traceability procedures.

We also provide a drawing service, as many customers send us samples or component parts against which to quote and supply a mould. This presents no problem and we can supply a dimensioned drawing for your approval prior to making a mould tool. You'll appreciate that if we use a sample only to create the mould this has to be accepted as our interpretation.

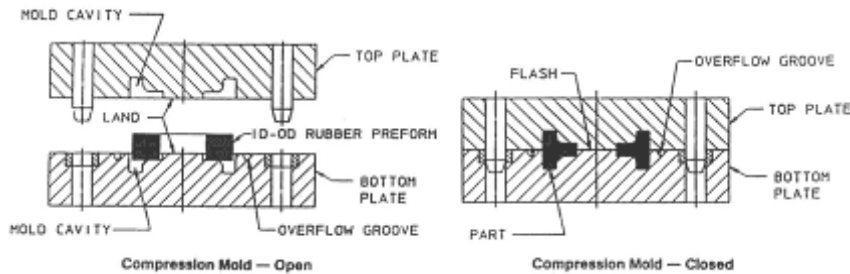

Typical Moulded Components:-

- Bellows ▪ Discs ▪ Covers ▪ Gaiters
- Boots ▪ Vibration Mounts ▪ Grommets
- Rubber / Metal Bondings ▪ Cups ▪ Suckers
- Diaphragms ▪ Sheets ▪ Balls ▪ Gaskets
- 'O'-Rings ▪ Seals

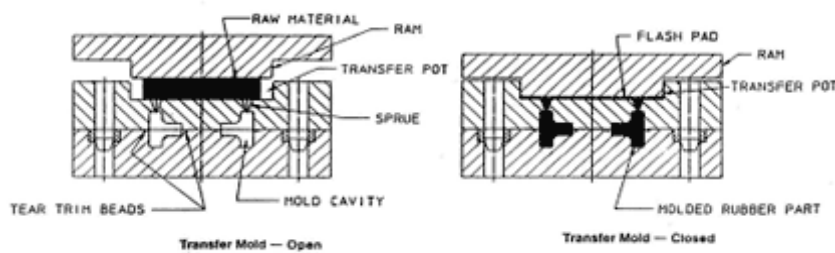

Our normal practice is to work to ISO3302 M2 tolerances, though occasionally tolerance to M1 is required for some components depending on size and complexity.

Mike Zhang – J-Flex China Superb
Sales Manager

Lance Bradley -Sales Manager

Mr Chen - Owner China Superb

At the official opening of the brand new
production facility.

Having established a firm manufacturing and distribution footing in Europe we are expanding yet again; this time to China, the world's fastest growing economy. J-Flex has teamed up with a new joint venture partner to create 'J-Flex China Superb' our brand new moulding facility situated in Hangzhou – the huge economic centre of south China. This expanding partnership can now offer our customers extended benefits of moulded product experience – including rubber to metal bonding. Add competitive pricing for a wide range of rubber and plastic components, combined with our renowned delivery service, shipment tracking and personal customer service and you'll get the very best from J-Flex. Hangzhou was celebrated by that great 14th Century traveller Marco Polo who immortalised the ancient Silk Route. Who knows, perhaps J-Flex might achieve fame as the developer of the Silicone Route!

NEWS RELEASE

MIKE ZHANG JOINS J-FLEX CHINA BUSINESS

As from 1 January 2007, Mike Zhang has joined the J-Flex China Superb business as Technical Consultant.

Based from our office in Hangzhou, Mike is a graduate in Polymer Engineering, and has worked in the emerging Chinese rubber industry for over 4 years.

Mike is responsible for all aspects of J-Flex's source marketing operations in China, trouble shooting and solving any problems on existing business for rubber and plastic moulded components + sourcing other rubber and plastic products and materials from China as and when required.

Mike can be contacted via J-Flex as follows:-

E-mail: mike@chinasuperb.com
